EDUCATION

2019 - 2024

MEMORIAL UNIVERSITY

- Bachelor of Electrical Engineering

2017 - 2019

ST. JOHN'S JUNIOR COLLEGE

- Associates of Math and Physics

SKILLS

- Python/MATLAB/SQL
- Multisim/PSpice/Easy EDA
- AutoCAD/SketchUp/Solidworks
- Microsoft Office
- Team Work
- Research

CERTIFICATIONS

- WHMIS
- Tech Stewardship
- PEGNL (Engineer-in-Training)

AWARDS

- Caribbean Advance Proficiency Examination Award of Excellence
- Holy Redeemer Credit Union Grant
- Caribbean Secondary Education Certificate Award of Excellence

WORK EXPERIENCE

Cost Control Student (Co-op)

Sep 2023 - Dec 2023

Pennecon Limited

St. John's, NL

- Utilized advanced Excel functions to analyze and compare financial documents against project budgets, improving tracking accuracy.
- Delivered regular progress updates and authored a comprehensive onboarding report to support future hires.
- Quickly adapted to cost control protocols and templates, enabling accurate tracking of hours, material quantities, and training metrics.

Data Analyst (Co-op)

May 2022 - Aug 2022

C-CORE

St. John's, NL

- Conducted systematic website testing and delivered actionable feedback to the software development team, enhancing user experience and functionality.
- Participated in project update meetings with senior staff, presenting findings and supporting discussions with driven insights.
- Leveraged MATLAB and Microsoft Office to analyze project trends and create client-facing reports.

Satellite Imagery Analyst (Co-op)

Sep 2021 - Jan 2022

C-CORE

St. John's, NL

- Collaborated with the Earth Observation team to generate and analyze iceberg data using ArcGIS Pro and Excel.
- Maintained organized datasets and ensured consistency through standardized file naming conventions and documentation practices.
- Contributed to data accuracy by performing regular quality control checks and peer reviews on research outputs.

Engineering Intern (Co-op)

Jan 2021 - Apr 2021

FT Williams and Associates

Belize City, Belize

- Estimated material costs, generated bills of materials, and reviewed shop drawings to support project planning.
- Assisted technicians with on-site work while learning and applying NEC regulations.
- Updated floor plans, panel maps, and 2D/3D drawings to reflect design changes and support project documentation.

KEY PROJECTS

Face ID Smart Lock| Capstone Project (2024)

- A Raspberry Pi-based system that utilized facial recognition and AWS technologies. Designed and 3D printed the smart lock housing; modelled in SketchUp and refined in Onshape. Also contributed to the power supply design and circuit protection.

Belize Dry Cleaners Industrial Installation| FT Williams (2021)

- FT Williams was responsible for installing electrical and ventilation systems for Belize's main dry cleaner. Assisted with installing electrical panels, wire distribution, UPS systems, and data lines. Also practiced site safety protocols.

Eco-Friendly Toy| Solidworks Design (2020)

- Team design project. Generated parts, assembly and exploded view drawings for a pinball machine. Also provided material and physical specifications.
